Profile

I am an architect with a well-planned work and life balance who enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me.
Irrespective of my 4 years enrolled as a computer/software engineer at the University of Buea, Faculty of Engineering and Technology, I have worked professionally in the field of software development for over 3 years using the agile method of software development that helps deliver value to customers faster and with fewer headaches.

Several of my projects over the past years make heavy use of CSS3, HTML5, JavaScript, AJAX, XHTML, XML/DOM, Sass, distributed version control systems such as GIT, BEM naming conventions, front-end frameworks like Angular, React, Redux, package manager and build tools like NPM, WebPack, rest API back-end servers with NodeJs, Python(flask and Django), NoSQL Databases like MongoDB and SQL databases like MySQL, PostgreSQL, as well as constant solving of data structure and algorithm challenges in both Java and JavaScript, via which I have gained a somewhat deep understanding of these technologies.

Work Experience

10/2019 – 05/2020 Buea, Cameroon	Full Stack Developer WaZaHub Development of rest API (micro-service architecture using flask framework) building email templates, deploying the service on AWS using Docker technologies, querying and managing Mysql Databases.

Education

06/2012 Kumbo, Cameroon	**Science	Ordinary Level(17-points | 10 papers)** **Government Bilingual High School Kumbo.**
06/2014 kumbo, Cameroon	**Science	Advance Level (15-points | 5 papers)** **Government Bilingual High School Kumbo**
06/2019 Buea, Cameroon	**Computer Engineering	Software Engineering** **University of Buea**
12/2021 Remote, Internet	**Full Stack Engineering	MERN Stack** **The Odin Project**

Skills

#HTML5 # JavaScript # React.js # Node.js # React Native # CSS3 # Git # Java # Python

Some Projects

06/2021	**My personal Portfolio**
	https:;//msb-geneasocial.herokuapp.com/porfolio/home
	This was my third portfolio site to showcase all the projects I have worked on so far. It was built in React

08/2021	**E-Commerce Site** https:/msb-shop-159bb.web.app/ shopping site React framework, commerce.js back-end firebase hosting stripe demo account
07/2021	**Restaurant Web Application** https://mrsuber.github.io/odin_project_06_restaurant/ Restaurant demo web all JavaScript, Html, and Css. Helped in mastering async and await functions to fetch data form a third party API. (when you search for a meal for example eggs, or beef, it response with different dishes and a manual to prepare them.
11/2021	**Geneasocial** https://msb-geneasocial.herokuapp.com/ Geneasocial is a secure social media site tailored only for Geneo students. This way students and instructors can privately socialize without the whole public being part of it making learning fun. Technologies used: HTML, CSS, Bootstrap, JavaScript, React, Redux, Nodejs, MongoDB. Images and videos are saved in a third party Cloudinary.
